silk an increase of fully ten per cent. in the total value of business transacted would have been abown." With reference to silk the report states that when it is conthis article oxogeded in 1892 by nearly twenty per cent, the value of all imports in that year, it will readily be seen that a reduction of nearly one third in shipments during 1893 has so great an effect upon the figures showing the entire trade as easily to give a wrong impression. We turn now to amports, under which heading we find it stated that " Not withstanding a continued fall in exchange throughout the year from 2s. 81d. "in January to 2s. 31d. in December, or nearly 18 per cent, the trade in imports shows a large increase in volume and brought the world several steps nearer the values, the latter amounting to \$6,305,069 "yen against 31,328,9 15 you in 1892, or approximately 5,000,000 you additional trade. And it is worthy of note that this gain "has been more than doubled at Kobe and "Osaka. This would imply a very prosperous condition of affairs throughout the " country," This is reassuring, and it may be noted in passing, as a matter of interest to Hongkong with its large sugar refineries, Per doz. Says a home paper :- Owing to recent favournble reports, the attention of the British r lie, especially of the speculative porti neofhas been directed to the gold-mining industry of the Colar district of Southern India. The produce of these tields is as nothing compared with that of South Africa or Austrelia, but it is in creasing with mercellons stondinate, and great things are looked for in the future. Only four of the mines are of importance, the Opreyum holders the former returns 55 per cent. for last year, and the Mysore dividends for the past five years have been 424, 774, 70, 35, and 65. Smoler mines have paid from 20 to 40 per coct. A striking difference between these and the Afri onn fields lies in the more equal distribution of the gold, the sudden failure of a vein, so common on incident in the Transvant, being practically unknown in Colar.
